Basic control systems for dependable spreading applications

The EZ Spread™ features the most reliable controls for basic spreading applications. Designed for granular and pre-wet applications, the EZ Spread electronic spreader control system from Certified Cirus Control Systems combines core functionality with user-friendly operations.

PRODUCT SUMMARY
- Ground speed oriented or manual spreader control
- Includes 3 channels for 2- or 3-channel operation
- Open-loop control for auger, spinner and auxiliary (pre-wet, X-conveyor) channels
- Adjustable settings from 0–10
- Backlit control panel
- Programmable trim settings

PROPORTIONAL CHANNELS
- Independent control of 3 proportional channels
- Usually configured for auger/conveyor, spinner and either cross auger or pre-wet

GROUND SPEED OPTIONS
- Ground speed triggered (GST): starts with truck motion, off when truck stops
- Ground speed oriented (GSO): on with truck motion, automatically adjusts output to compensate for truck speed, off when truck stops
- Manual: no ground speed interaction

HYDRAULIC TRIMMING
- Configuration mode for hydraulic trimming without manual trim pots

BLAST AND PAUSE
- Programmable blast included (on/off, timed)
- Use pause switch to pause spreading
- System powers up with pause active to prevent indoor spreading

OUTPUT SIGNAL
- Multiple frequency settings for ease of valve compatibility

POWER SAFETY
- Power Safe™ signal prevents random grounds powering any hydraulics system attached (auger, spinner, conveyor, etc.)
- Channel Safe™ detects and protects against open or short circuits on hydraulic drive channels

OPERATING TEMPERATURE RANGE
- Minimum: –20 degrees Celsius; maximum: 70 degrees Celsius

POWER REQUIREMENTS
- Minimum: 11 Volts DC
- Maximum: 15 Volts DC
- Maximum: 10 Amps
- Internal fuse rated at 10 Amps
